

How to configure CMS on your firewall

How to configure CMS on your firewall

In this document we will guide you through the configuration of CMS on your firewall.

1. First go to Definitions -> Hosts. The following screen appears

The screenshot shows the 'Hosts' tab selected in a configuration interface. At the top, there are tabs for 'Hosts', 'FQDN hosts', and 'Host Range'. Below the tabs is a search bar with a dropdown menu set to 'All' and a search icon. To the right of the search bar are four icons: a plus sign, an up arrow, a down arrow, and a question mark. Below the search bar is a table with the following columns: 'All', 'Host ID', 'Host IP', 'IP Version', 'Status', and 'Tasks'.

<input type="checkbox"/> All	Host ID	Host IP	IP Version	Status	Tasks
<input type="checkbox"/>	GaJsHiElD	58.68.55.140	IPv4	Inactive	
-	fwip-LAN	192.168.2.42	IPv4	Active	-

2. Click on icon. The following screen appears

The screenshot shows the 'Add Host' form. At the top, there are tabs for 'Hosts', 'Country Groups', 'FQDN hosts', and 'Host Range'. Below the tabs is a form with two input fields: 'Host ID' and 'Host IP'. The 'Host ID' field contains the text 'cmsserver' and the 'Host IP' field contains the text '192.168.2.248'. Below the input fields is an orange 'Add' button. To the right of the form is a question mark icon.

Specify the Host ID and Host IP

HOST ID: A name given to the IP address defined below.

This name does not have to be the hostname of the IP address given. It can be any name which can be associated with the IP address

HOST IP: IP address (IPv4 / IPv6) of the host defined above.

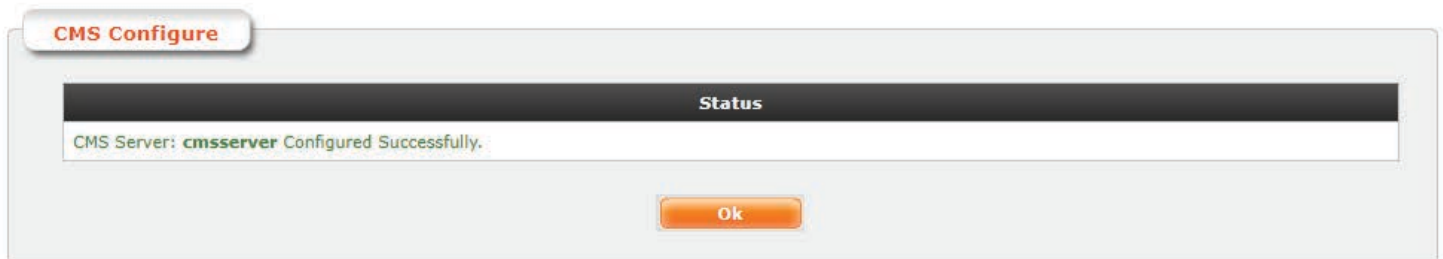

The screenshot shows a 'Status' message box. At the top, there are tabs for 'Hosts', 'Country Groups', 'FQDN hosts', and 'Host Range'. Below the tabs is a message box with the text 'Host: cmsserver added successfully.' and an orange 'Ok' button.

3. Now go to Management -> CMS and Configure CMS Server by selecting the appropriate CMS Server from the drop down list

The screenshot shows a dialog box titled "CMS Configure" with a question mark icon in the top right corner. Inside the dialog, there is a section titled "Configure CMS Server". Below this title, there is a label "Select CMS Server:" followed by a dropdown menu that currently displays "cmsserver". At the bottom of the dialog, there are two buttons: "Configure" (highlighted in orange) and "Cancel" (in a dark grey box).

Congratulations, you have successfully configured CMS server on your firewall.

The screenshot shows a dialog box titled "CMS Configure" with a question mark icon in the top right corner. Inside the dialog, there is a section titled "Status". Below this title, there is a message: "CMS Server: **cmsserver** Configured Successfully." At the bottom of the dialog, there is a single button labeled "Ok" (highlighted in orange).
