**GAJ**SHIELD

## New Features:

1. Interface speed and duplex value will be displayed with speed test results.
2. Subnet of network used in tunnel will be displayed on hovering over netwok name.
3. Admin authentication can now be done using LDAP and Active Directory.

## Bug Fixes:

1. Fixed issue where uploading license resulted in error.
2. Fixed issue where Failover did not work when QoS Queues are applied.
